## **Exporting High Resolution Graphs**

## Exporting high resolution graph from Excel or Google Sheets

The following instructions below are interchangeable for Excel and Google Sheets. For saving high resolution images from Tableau, you'll need to zoom into your graph/chart and take a screenshot.

- **1. Right-click** on your graph or chart
- 2. Select 'Save as Picture' option from drop down-menu.
- 3. In the Save panel, under 'Save as Type', select SVG or PDF. Save file.

You can also submit your data/charts as an separate Excel document when you upload your manuscript to JIPE.
